Visualization & BI: Power BI, Tableau

Programming: Python (Pandas, NumPy), Java

Web Basics: HTML, CSS

Tools: Git, GitHub

PROJECTS

E-commerce Sales Performance Dashboard

SQL, Power BI, Olist Brazilian E-commerce Dataset

Analysed 1 lakh orders across 9 tables using SQL (joins, CTEs, window functions) to calculate revenue, AOV, delivery time and repeat-customer rate.

- Built an interactive Power BI dashboard with 6 KPIs and filters by region, category and time period.
- Identified finding late deliveries drop average review scores from 4.3 to 2.6 and recommended lighter seller shipping-time estimates to improve customer satisfaction.
